CLIMATE CRISIS: 7 Actions for 7 Generations

Manage your land like an Ecosystem Boss
Nothing beats climate change like nature based local solutions.
- Plant more native plants and trees which help capture stormwater and create wildlife habitat.

Step Lightly
Transportation is the #1 source of greenhouse gas (GHGs) emissions in the USA.
- Take more mass transit – buses, trains, and metro and say no to more highway expansions.
- Bike, scooter, walk more, carpool, drive fuel efficient cars, and fly less.

Eat More Plants
Animal Agriculture is the 2nd largest contributor to GHGs after fossil fuel emission.
- Cut down on meat consumption and eat more plants instead.
- Create your own garden at home or at school.

Become a Science Superhero
Community science projects connect people to nature and scientist gather valuable data.
- Check out a project in your area and use these apps: ANS’s Creek Critters®, eBird and iNaturalist.

Refuse, Reuse, Reduce & Recycle
- Think before you buy or take.
- Learn to live with less.

Follow the Children
Children are leading the future of the world.
- Support youth-led movements.
- Organize, mobilize and take action now!!

Up Your Political IQ
Become politically active to solve the climate crisis.
- VOTE in the 2020 elections.
- Fill out the 2020 U.S. Census.
